PROFESSIONAL SUMMARY

Results-driven Data Analyst and Business Intelligence professional with hands-on experience in financial, product, and operational analytics. Proficient in SQL, Power BI, Excel, DAX, and Power Query, with expertise in data modeling, visualization, KPI development, and reporting automation. Proven ability to transform complex, multi-source datasets into actionable insights, having analyzed over 1m records, built end-to-end reporting solutions, and reduced reporting time by over 70%. Skilled in identifying performance gaps, improving data quality, analyzing customer behavior, and translating analytical findings into strategic recommendations that drive business growth and operational efficiency.

SKILLS SUMMARY

Technical Skills:	Excel | SQL | Power BI | Tableau | Data Visualization | DAX | Data Wrangling and Cleaning | Power Query | ETL | Data Modeling | Business Intelligence | Data Integration | Reporting Automation | Data Reconciliation | KPI Development
Developing Skills:	Python | Data Engineering | Database & Pipeline Architecture | EDA | R
Soft Skills:	Communication Skill | Analytical and Critical Thinking | Problem-Solving | Storytelling with Data | Collaboration | Attention to Detail | Strategic Thinking | Work Ethic

CERTIFICATIONS

Microsoft Power BI Data Analyst Professional Certificate (In-Progress)	Expected March 2027
Google Data Analytics Professional Certificate (In-Progress)	Expected December 2026
Hacker Rank SQL Basic | **LINK**	October 2024
IBM Excel Basics for Data Analysis	July 2024
Lighthall Data Analytics: 5-Week Bootcamp | **LINK**	April 2023

EDUCATIONAL BACKGROUND

University of Nigeria; Nsukka, Enugu State 2011 - 2015
B.Sc. Economics

WORK EXPERIENCE

Xend Finance (Remote)
Data Analyst May 2025 – Present

- Transformed a highly manual reporting process into Excel → Power Query → Power BI reporting automation system within 3 months, reducing reporting time by 70%+ and enabling faster, more consistent business insights.
- Built and maintained cross-product financial analytics covering crypto and stablecoin transactions (withdrawals, deposits, currency swaps), savings, investments, providing visibility into weekly and monthly business performance.
- Consolidated and modeled datasets and 800K+ rows across 250+ fields, developing 500+ DAX measures for dynamic KPIs, growth analysis, customer segmentation, retention and transaction intelligence.
- Designed KPI and performance frameworks for core products, tracking transaction volume, transaction count, WoW/MoM growth, active customers, product adoption, retention, NetFlow and weekly/monthly targets to identify performance gaps and growth opportunities in an executive-ready dashboard.
- Rebuilt the analytics model following the launch of a new application, cleaning, transforming, reconciling and integrating legacy and new-app data across different identifiers, schemas and migrated customer populations while preserving historical reporting continuity.
- Delivered behavioral and customer analytics that identified user engagement and retention gaps, supporting action plans to re-engage lost customers, improve retention and increase product activity.

Hammer Games (Remote)
Data Analyst May 2025 – Present

- Established the company's analytics function from scratch as its first and sole Data Analyst, developing KPI frameworks, reporting processes, and performance dashboards to support data-driven decision-making.

- Designed interactive Power BI dashboards using Unity Analytics and PlayFab data, leveraging SQL, Power Query, and DAX to analyze player acquisition, engagement, retention, monetization, and gameplay performance.
- Evaluated influencer-led acquisition campaigns, identifying over 1,500% growth in DAU and 2,500% growth in DNU within 48 hours, providing actionable insights into marketing effectiveness and player acquisition.
- Identified critical player retention challenges through cohort and behavioral analysis, collaborating with product teams to develop strategies that improve player engagement and long-term retention.
- Led tournament analytics and reporting, monitoring player registrations, leaderboard rankings, XP progression, and qualification rates, while consolidating and deduplicating multi-source datasets to improve reporting accuracy.

Amdor Analytics (Remote) **Projects**

Data Analyst Intern November 2024 – December 2024

- Sourced multiple data, cleaned and wrangled large datasets from various industries using Excel and Power Query
- Developed Power BI dashboards to visualize trends and patterns, uncovered insight, and aid data storytelling.
- Effectively communicated findings through data analysis reporting for effective data-driven decision making.

Union Bank Plc

Banker (DSA, Customer Service Representative, Relationship Manager) March 2018 – July 2022

- Built a fast-rising banking career, earning 2 promotions within 3 years due to consistent high performance & leadership.
- Delivered 100%+ growth in loan disbursements and 40%+ increase in deposit mobilization (H2 2021–H1 2022)
- Achieved ~80% KPI performance rating, ranking as the 2nd highest performer in 2020.
- Emerged as Top performer in loan count (H1 2018) and M-Cash penetration (H2 2018).

TECHNICAL PROJECTS

Profitability & Sales Analytics | Excel and SQL **LINK**

Objective: To uncover sales, product, customer, and regional performance trends using transactional data from a global retail store to drive profitability and data-driven decision-making.

- Evaluated product and regional performance, uncovering 3,032 unprofitable products and 29 loss-making countries.
- Analyzed time-based trends revealing December as peak sales month and weekends as low-performing periods.

Segmented customer behavior and identified top 10 profitable customers and 67 loss-generating ones.

Result: Revealing $558k in losses from poor product performance and $447k from underperforming countries. Delivered actionable recommendations for pricing, customer loyalty, and targeted marketing strategies.

Global Sales & Multi-Currency Performance Analysis | Power BI **LINK**

Objective: To analyze multi-currency sales, customer, product, and regional performance using transactional data from a global retail operation, enabling accurate revenue reporting and data-driven strategic decisions.

- Built a Power BI dashboard analyzing $55.76M in sales across 67 stores and 8 countries, resolving multi-currency challenges using Date and Currency bridge tables with daily exchange rates.
- Identified key growth and risk drivers, including 68% growth in online sales, strong generational spending patterns, extreme seasonality, and 43% revenue concentration in the U.S.

Result: Data-driven insights to support channel expansion, Generational marketing and geographic diversification.

Ride-Hailing Business Analysis | SQL **LINK**

Objective: Analyze ride-hailing data to uncover revenue trends, driver performance, and operational improvement opportunities.

- Cleaned and transformed four datasets; developed SQL queries to answer eight business questions covering revenue, cancellations, rider behavior, and driver performance.
- Translated query results into business insights and recommendations to support driver incentives, cashless payment adoption, and investigation of high-cancellation cities.

Result: Identified revenue growth trends, cancellation hotspots (Chicago: 19.26%), top-performing drivers, and bonus-eligible drivers to support business decisions.

ESG & Financial Performance Analysis| Excel **LINK**

Objective: To analyze the relationship between companies' ESG performance and financial outcomes across industries and regions from 2015–2025.

- Analysed data for 1,000 companies across 9 industries and 7 regions (2015–2025) using Excel pivot tables, charts, and correlation analysis.
- Found European firms leading in ESG compliance, while emerging markets delivered higher financial returns despite lower ESG maturity.

Result: Environmental scores showed the strongest positive correlation with financial performance, including profit margin (0.24) and market capitalisation (0.24), while Finance and Technology led in overall ESG performance.
