PROFESSIONAL SUMMARY

Detail-oriented and results-driven Data Analyst with experience delivering business-critical insights through Power BI, SQL, Excel, and Web3 analytics platforms. Skilled in transforming complex, multi-source datasets into dashboards and KPI reporting systems that improve decision-making and operational efficiency. Proven track record across financial performance, transaction analytics, consumer complaint trends, ESG analysis, including building scalable models with 500+ DAX measures and reducing reporting time by over 70%. Adept at storytelling with data, stakeholder collaboration, and driving measurable business outcomes.

SKILLS SUMMARY

Technical Skills: Excel | SQL | Power BI | Tableau | Data Visualization | Flipside | Dune | Data Wrangling and Cleaning | Power Query | ETL | Data Modeling | Data Manipulation | Statistical Analysis | Business Intelligence | Python | EDA

Soft Skills: Communication Skill | Analytical and Critical Thinking | Problem-Solving | Storytelling with Data | Collaboration | Attention to Detail | Strategic Thinking | Work Ethic | Marketing | Relationship Management | Negotiation | Customer Service | Research Skills

CERTIFICATIONS

Microsoft Power BI Data Analyst Professional Certificate (In-Progress) — Expected March 2027

HackerRank SQL Basic | **LINK** — October 2024

IBM Excel Basics for Data Analysis — July 2024

Google Data Analytics Professional Certificate (In-Progress) — Expected March 2027

Lighthall Data Analytics: 5-Week Bootcamp | **LINK** — April 2023

EDUCATIONAL BACKGROUND

University of Nigeria; Nsukka, Enugu State — 2011 - 2015
B.Sc. Economics

WORK EXPERIENCE

XEND Finance (Remote)
Data Analyst — May 2025 – Present

- Transformed a highly manual reporting process into Excel → Power Query → Power BI reporting automation system within 3 months, reducing reporting time by 70%+ and enabling faster, more consistent business insights.
- Built and maintained cross-product financial analytics covering crypto and stablecoin transactions (withdrawals, deposits, currency swaps), savings, investments, providing visibility into weekly and monthly business performance.
- Consolidated and modeled datasets and 800K+ rows across 250+ fields, developing 500+ DAX measures for dynamic KPIs, growth analysis, customer segmentation, retention and transaction intelligence.
- Designed KPI and performance frameworks for core products, tracking transaction volume, transaction count, WoW/MoM growth, active customers, product adoption, retention, NetFlow and weekly/monthly targets to identify performance gaps and growth opportunities in an executive-ready dashboard.
- Rebuilt the analytics model following the launch of a new application, cleaning, transforming, reconciling and integrating legacy and new-app data across different identifiers, schemas and migrated customer populations while preserving historical reporting continuity.
- Delivered behavioral and customer analytics that identified user engagement and retention gaps, supporting action plans to re-engage lost customers, improve retention and increase product activity.

Analyst Lab (Remote) — **Project**
On-Chain Analyst Intern — January 2025 – April 2025

- Analyzed over 2.3B transactions and 156M unique users on the Base Chain using Flipside.
- Tracked monthly transaction growth, user activity, and fee behavior.
- Identified top wallets and most used tokens to highlight engagement patterns.
- Created interactive dashboards to visualize trends in transaction volume, fees, and user growth.

Amdor Analytics (Remote) **Projects**

Data Analyst Intern November 2024 – December 2024

- Sourced multiple data, cleaned and wangled large datasets from various industries using Excel and Power Query
- Developed Power BI dashboards to visualize trends and patterns, uncovered insighted, and aid data storytelling.
- Effectively communicated findings through data analysis reporting for effective data-driven decision making.

Union Bank Plc

Banker (DSA, Customer Servies Representative, Relationship Manager) March 2018 – July 2022

- Built a fast-rising banking career, earning 2 promotions within 3 years due to consistent high performance & leadership.
- Delivered 100%+ growth in loan disbursements and 40%+ increase in deposit mobilization (H2 2021–H1 2022)
- Achieved ~80% KPI performance rating, ranking as the 2nd highest performer in 2020.
- Emerge as Top performer in loan count (H1 2018) and M-Cash penetration (H2 2018).

TECHNICAL PROJECTS

Profitability & Sales Analytics | Excel and SQL **LINK**

Objective: To uncover sales, product, customer, and regional performance trends using transactional data from a global retail store to drive profitability and data-driven decision-making.

- Evaluated product and regional performance, uncovering 3,032 unprofitable products and 29 loss-making countries.
- Analyzed time-based trends revealing December as peak sales month and weekends as low-performing periods.

Segmented customer behavior and identified top 10 profitable customers and 67 loss-generating ones.

Result: Revealing $558k in losses from poor product performance and $447k from underperforming countries. Delivered actionable recommendations for pricing, customer loyalty, and targeted marketing strategies.

Global Sales & Multi-Currency Performance Analysis | Power BI **LINK**

Objective: To analyze multi-currency sales, customer, product, and regional performance using transactional data from a global retail operation, enabling accurate revenue reporting and data-driven strategic decisions.

- Built a Power BI dashboard analyzing $55.76M in sales across 67 stores and 8 countries, resolving multi-currency challenges using Date and Currency bridge tables with daily exchange rates.
- Identified key growth and risk drivers, including 68% growth in online sales, strong generational spending patterns, extreme seasonality, and 43% revenue concentration in the U.S.

Result: Data-driven insights to support channel expansion, Generational marketing and geographic diversification.

Customer Complaints & Service Insights | Excel and Power BI **LINK**

Objective: To Identify significant patterns and trends in consumer's dissatisfaction.

- Conducted a 7-year analysis of 62,516 complaints submitted to CFPB about Bank of America, uncovering trends in consumer dissatisfaction and evaluating response effectiveness using Excel.
- Identified "Managing an Account" as the top issue (24% of complaints) and California as the state with the highest complaint volume (22%).
- Recommended automation for timely responses, preemptive customer communication strategies, and staff training to enhance customer satisfaction and operational efficiency.

Result: Revealed that 'managing an account' accounted for 24% of complaints, with 93.77% resolved on time, leading to recommendations for automated tracking systems.

ESG & Financial Performance Analysis| Excel **LINK**

Objective: To analyze the relationship between companies' ESG performance and financial outcomes across industries and regions from 2015–2025.

- Analyzed ESG and financial data, identifying a positive correlation (0.67) between ESG scores and profitability.
- Found European firms leading in ESG compliance, while emerging markets delivered higher financial returns despite lower ESG maturity.
- Revealed Governance as the ESG pillar most linked to long-term profitability and risk stability.

Result: Demonstrated that integrating ESG principles enhances brand reputation and financial resilience, guiding sustainable investment decisions.
